EDUCATION

University of California, Riverside

Bachelor of Science in Computer Science

GPA: 3.59

September 2022 - December 2025

EXPERIENCE

VR Quality Assurance Tester - Independent Contractor

November 2025 – April 2026

Wevr

Burbank, CA

- Collaborated with developers and designers to validate fixes and ensure stable application behavior before release.
- Identified, reproduced, and documented software defects related to user input, rendering, performance, and interaction logic
- Created detailed bug reports including reproduction steps, expected vs. actual behavior, and environmental conditions.

TECHNICAL SKILLS

Programming Languages: C/C++, JavaScript, SQL, PowerShell, Java, Python, TypeScript, HTML, CSS

Databases: MySQL, MongoDB, Google Firebase

Systems Administration: Active Directory, Windows Server, Group Policy Management

Cloud/Virtualization: Docker, Oracle VM VirtualBox, VMware

Operating Systems: Windows, Windows Server, Linux, Ubuntu, macOS, Unix

Libraries & Frameworks: React, Angular, Node.js, Next.js

Software Tools: Microsoft 365 (Word, Excel, PowerPoint, Outlook), Google Workspace

PROJECTS

Help Desk Ticketing System | *osTicket, Docker, MySQL*

[GitHub](#)

- Deployed an osTicket help desk environment using Docker Compose with separate containers for the web application and MySQL database.
- Documented architecture, troubleshooting errors, and demonstrated full ticket lifecycle management.
- Managed ticket lifecycle including creation, assignment, escalation, and resolution using industry-standard help desk practices.
- Provisioned and managed a MySQL backend database for ticket storage and user authentication.

Active Directory Homelab | *VirtualBox, Active Directory, PowerShell*

[GitHub](#)

- Designed and deployed a Windows Server Active Directory homelab in VirtualBox, creating a fully isolated private network for enterprise-style testing and administration.
- Automated the creation of 1,000+ Active Directory user accounts using a custom PowerShell script, significantly reducing manual provisioning time.
- Configured and managed core Active Directory services, including domain setup, organizational units (OUs), user accounts, group assignments, and domain authentication policies.
- Tested and verified domain functionality by joining client machines to the domain, validating authentication workflows, and confirming successful replication of user and group configurations.

Obfin (Finance Manager & Advisor Application) | *JavaScript, React.js, Node.js, Firebase*

[GitHub](#)

- Engineered financial management application that tracks transactions and offers AI assistant to help based on their financial context.
- Implemented scalable cloud-based infrastructure for the database via Firestore Database to display data collections as categories in numerous graphs using Recharts library.
- Integrated transaction editing/deleting that reflected changes both on visual graphs and on Firestore Database.
- Constructed backend portion (AI model calls) with Node.js + Gemini Flash API and frontend (interactive pages, forms, and charts) with React.js.

Portfolio Website | *TypeScript, Next.js, Tailwind CSS*

[GitHub](#)

- Built and deployed a full stack portfolio website using TypeScript and Tailwind to display resume.
- Implemented interactive and downloadable resume using TypeScript.
- Managed end-to-end development, including layout, styling, and production deployment through Cloudflare for optimized performance and availability
